

FASTA  
FASTA-4e

THE FIRST EXTERNAL 4 PORT PCI-e SATA 3Gb/s HOST ADAPTER CARD

FASTA-4e, from CalDigit, is the first external 4 port PCI-e SATA 3Gb/s host adapter card designed specifically for use with Apple's latest G5 Dual-core. FASTA-4e provides the missing external SATA ports for the G5 Dual-core. The FASTA-4e features high speed SATA 3Gb/s interface at 3 Gb/s bandwidth allowing connection of up to 4 external SATA devices.

FASTA is CalDigit's line of SATA 3Gb/s host cards designed for use in the PCI-e expansion slot to provide huge bandwidth for data throughput. Designed for high performance and reliability required for video editing. This adapter supports 10 bit uncompressed HD, 8 bit uncompressed HD, DV, HDV, DVPRO HD, 8-bit and 10-bit SD video workflows.

SATA 3Gb/s is an evolutionary replacement for FireWire, Fibre Channel and USB technologies currently used in the video editing industry. It provides affordable pricing, high performance data transfer rates, expandability and friendly configuration. The FASTA-4e will free up the FireWire bus of your G5 to allow video capture and playback devices such as DV camcorders, VCR's, AJA Io, LA and LD that require the full bandwidth of FireWire and high speed access to external hard drives.

Features:

- 4 External SATA 3Gb/s Ports.
- Connect up to 4 S2VR HD or 2 S2VR Pro
- 3.0 Gb/s bandwidth transfer speed
- Port multiplier capability
- Plug and Play
- Downward compatible with SATA I device
- 3-year warranty
