

The Fastest Dual Drive SATA 3Gb/s RAID Subsystem in the World

(August 15, 2006 Placentia, Ca.) CalDigit is now shipping the much anticipated S2VR Duo SATA II 3Gb/s subsystem. The S2VR Duo is the fastest, most affordable, SATA 3Gb/s RAID solution for multi-stream uncompressed 10 bit SD editing.

The S2VR Duo is a real hardware RAID solution, and can be configured for Performance, Protected, or JBOD. The cool-running, ball bearing fan-cooled, S2VR Duo is equipped with 2 SATA 3Gb/s hard drives and CalDigit's unique technology to support multi-streams of uncompressed SD, DVCPRO, HDV and DV non-linear video editing systems. The CalDigit S2VR Duo is the fastest dual drive SATA 3Gb/s subsystem in the world, able to reach speeds of 148 MB/s, so the user can easily edit up to 3 streams of 10 bit uncompressed SD video. The S2VR Duo is shipping now in 3 different capacities: 500GB, 1TB, or 1.5TB. The S2VR Duo features the latest SATA 3Gb/s technology for ultra high data transfer rates to support multi-stream video playback with real time effects.

“The feedback that we received on the S2VR Duo, it’s design and myriad of features at both NAB in Las Vegas, and at Siggraph in Boston this year was absolutely phenomenal,” said Jon Schilling, Account Manager at CalDigit. “We look forward to providing our customers with quality products that both work well and boost the productivity of their media productions.”

The S2VR Duo comes complete with the subsystem, intuitive GUI designed by CalDigit, password Protection, e-mail notification, HBA controller card, (PCI-e or PCI-x), driver CD, and an eSATA cable. CalDigit’s unique and sophisticated environmental control design helps the user monitor hard drive status, fan, power supply, and ambient temperature. Should any abnormal condition arise, the user will be notified audibly and an e-mail will be generated and sent to any e-mail address that the user pre-designates. The CalDigit FASTA-4e (PCIe) or FASTA-4x (PCI-x) HBA controller card comes with each unit, giving the user a total solution. We don’t just bundle our card with our solution. The FASTA cards were designed and developed by CalDigit to be part of our complete product system from day one. The S2VR Duo is tailor-made for professional video editors or for the avid amateur looking for a reliable, quality product. CalDigit stands behind our quality line of products with an industry ground-breaking three-year warranty.

S2VR Duo prices start at \$549.00 for a 500GB system, which includes our FASTA-4e or FASTA-4x HBA controller. CalDigit Inc is a manufacturer of affordable, quality SATA II 3Gb/s RAID products. CalDigit is located in Orange County California at 1941 Miraloma Ave STE B, Placentia CA 92870. This product can be purchased through any one of these fine authorized retailers.
